1.2

It does not load the map and it shows the html header at the top of the page

1.3

The website is served from a web cache between the host and the user

1.4

The maximum age of the cache before it has to do a new request to the host

2

2.1

If the field is too small it only sends the characters within the specified length. If the field is too large it will return a 400 bad request and it will keep waiting until the character limit is reached.

3

3.1

No because of local caching

3.2

Because the username and password have to be send with every request the page now denies access (401).

4

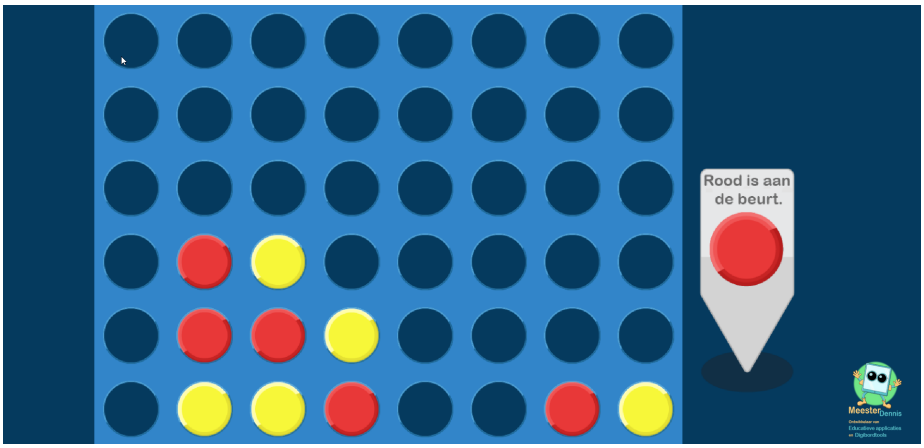
4.1

Connect 4

4.2

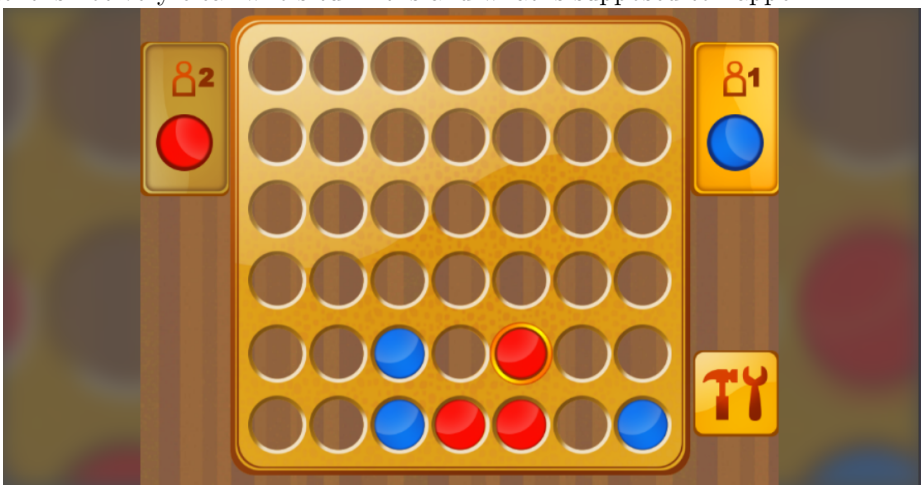
`https://basisonderwijs.online/digibordtools/vieropeenrij.html`

A positive aspect of this game is that it is very clear who's turn it is, there is no noise or clutter. A negative aspect is that the game doesn't look very good.



`https://www.spelletjes.nl/spel/4-op-een-rij`

A positive aspect of this game is that it looks good. A negative aspect is that it is not very clear who's turn it is and what is supposed to happen.



A positive aspect of this game is that it is clear who's turn it is and how long it has taken. A negative aspect is that looks kind of bland.
